Resume of
Muhammad Abu Sufian
Cell: +8801777481983
E-mail: saykat.s7@gmail.com

Objective: To achieve a dynamic position in an organization that offers me to learn and reap higher reward of success and can utilize my experience, educational and analytical skills to enhance competence of an organization and myself.

Experience: **4+ years in .Net Core, NodeJs and Angular**
In my career, I have got chances to work on variety of projects including ERP systems. I have been working on .Net Core, NodeJs, Angular, AngularJs, JQuery and others JavaScript libraries as full-stack developer since Jan 2016.

Education: **Bachelor of Science (B.Sc. Hons) in Information Technology**
University of Derby, UK
Degree Awarded–2016, Result – Higher 2st Class.

Expertize: **C#, ASP.net, Entity Framework**
I am Proficient in C# infrastructure, language standards, and object modelling technologies. I am used to work in ASP.net MVC and Web API project.

JavaScript, Node, Angular, AngularJs, JQuery
Full stack JavaScript is one of my mentionable skill. I can write JavaScript code keeping in both server and client side effects. I have experience on Node, Express, JQuery etc.

SQL, NoSQL
Modeling data structure is getting more interesting for me nowadays. With SQL data modeling. I am getting involved in NoSQL based data modeling. In that case I am exploring MongoDB.

HTML, CSS, Bootstrap, Material Design
I have Extensive knowledge in web design technologies. I have expertise in HTML, CSS, Bootstrap, Responsive Web Designing and Cross-Browser support.

Design Pattern & Principle
Firstly, I try to match a business problem with one/more suitable design pattern. It helps me to solve the problem future proven, less buggy when changes come and make my co-workers happier when have to refactor. Also following design principal is one of the de facto for me while writing codes.

Git, NPM, WebStorm, Visual Studio, Re-Sharper
You might be a good programmer, but to become a good software developer

you must have lot of knowledge on different dev tools. Since the beginning I have been using Git, npm, webpack, webstorm and Visual Stuio etc.

AWS Service
Though I have few working experience on EC2, S3 and Route 53, I am eagerly searching chance to on other service like Dynamo DB, RDS, Cloud front etc.
